

PRESS RELEASE

KRIP AI Launches Nationwide "Youth Day 2026" Initiative to Train 100 Young AI Innovators for Free

Kathmandu, Nepal – July 12, 2026

KRIP Artificial Intelligence Tech Pvt. Ltd. is proud to announce the launch of **KRIP AI Youth Day 2026**, a nationwide educational initiative celebrating International Youth Day on August 12, 2026. The program aims to provide 100 selected young learners with free Artificial Intelligence (AI) and Machine Learning (ML) training, helping equip the next generation with skills for the future.

As artificial intelligence continues to transform industries worldwide, access to quality AI education remains limited for many aspiring learners. Through this initiative, KRIP AI seeks to make AI education more accessible by removing financial barriers and creating opportunities for motivated students from across Nepal.

The program is open to school students, college students, university students, recent graduates, and self-motivated young learners with a passion for technology and innovation.

Participants will receive practical AI and Machine Learning training, project-based learning experiences, mentorship, career guidance, and a certificate upon successful completion of the program.

To recognize outstanding dedication and performance, the top five participants, based on the program's evaluation process, will each receive a laptop as an award.

Program Objectives

The KRIP AI Youth Day 2026 initiative has been designed to:

- Expand access to Artificial Intelligence and Machine Learning education.
- Remove financial barriers for motivated learners.
- Encourage innovation and problem-solving using AI technologies.
- Discover and nurture talented young AI innovators from across Nepal.
- Build practical, project-based technical skills.
- Prepare participants for future academic and career opportunities in AI.

Program Timeline

The KRIP AI Youth Day 2026 initiative will follow a structured timeline to ensure a transparent and engaging learning experience. Applications open on July 12, 2026, inviting aspiring young learners from across Nepal to apply for one of the 100 available seats. Following the application review process, the selected participants will be announced on August 1, 2026 via email and official communication channels. The program will officially launch on August 12, 2026, in celebration of International Youth Day, marking the beginning of the free AI and Machine Learning training. During the training period, participants will complete interactive learning modules, practical projects, assignments, and assessments designed to build real-world AI skills. Upon completion, a final evaluation will be conducted using predefined and transparent assessment criteria to measure participants' performance and progress. The initiative will conclude with a Recognition Ceremony, where the top five performers will each receive a laptop in recognition of their outstanding achievement, while all successful participants will be acknowledged for their dedication and commitment to learning Artificial Intelligence and Machine Learning.

Message from KRIP AI

At KRIP AI, we believe that talent is everywhere, but opportunity is not. Through KRIP AI Youth Day 2026, we aim to provide young people with an opportunity to learn emerging technologies, develop practical skills, and prepare for the future of work.

Artificial Intelligence is becoming one of the most influential technologies of our time, and Nepal's youth deserve opportunities to participate in this transformation. This initiative reflects our commitment to promoting innovation, education, and technological advancement.

Applications

Applications are now open.

Interested candidates can learn more and apply through the official KRIP AI website.

Program Details

The KRIP AI Youth Day 2026 initiative is being organized by KRIP Artificial Intelligence Tech Pvt. Ltd. to celebrate International Youth Day 2026 and empower the next generation of AI innovators in Nepal. The program will officially launch on August 12, 2026, and is open to applicants from across Nepal. A total of 100 participants will be selected through a competitive application process to receive comprehensive Artificial Intelligence and Machine Learning training at no cost. The program is completely free, ensuring that financial limitations do not prevent talented young people from accessing quality AI education. Upon successful completion of the training and final evaluation, the top five performers will each be awarded a laptop in recognition of their exceptional performance and dedication.
